

**G-GLASS world's first state-of-the-art convergence ICT product
 (Clear Video Glass)**

G-GLASS is a convergence ICT (Information and Communications Technology) product that has the basic characteristics of transparent glass and can display still or motion media images. It is the world's first IT building material and can be applied to many places where glass is used. The G-GLASS can be fitted in new exterior construction or as a retrofit on the inside of an exterior window.
